Zoologica

Maxi 24 Zoologica exotic egg incubator

Parrot and other exotic bird breeders demand an incubator capable of handling delicate eggs that may need very frequent turning along with extremely precise control of humidity and ventilation.

The Maxi 24 EX has become very popular with parrot breeders for its superb temperature and humidity control along with fantastic reliability, but the parrot breeding experts we work closely with suggested further improvements, specific to the needs of parrot breeders. The result is the Maxi 24 Zoologica.

Four egg size quadrants included, 'mix and match' for mixed egg sizes

Approximate egg capacities:

Finch, Lovebird 68 eggs

Cockatiel 40 eggs

**Cockatoo, Small Macaw,
Eclectus, African Grey,
Amazon 24 eggs**

- Slower egg turning with soft-start to provide gentler turning for small and fragile eggs
- New parrot egg quadrants for smaller eggs: leads to less egg damage, more reliable turning of small eggs and increased capacity to 68 eggs
- Updated software for improved ease of use

KEY FEATURES

- Ideal for parrots ✓
- High visibility cabinet ✓
- Integral automatic humidity control ✓
- Display of humidity ✓
- Fine control of autoturn ✓
- Slower turning/soft start ✓
- Digital display of temperature ✓
- Automatic egg turning ✓
